

Help provide a safe and enjoyable experience for everyone.

Please follow these

Healthy Swimming Tips

Please keep children who are not toilet trained out of the lake.

Swim diapers and pants are not leak proof. Germs can spread in the water if they have an "accident."

Change diapers in a bathroom, not near the shore or on a picnic table.

Germs can contaminate surfaces and objects around the water.

Take your children to the bathroom often.

Waiting to hear "I have to go" may mean it is too late.

Stay out of the water if you have diarrhea.

People can spread germs in the water even without having an "accident."

Avoid drinking the lake water.

Remember: There are germs in the lake because it is everybody's swimming water!

Do not feed the ducks and geese.

Feeding them increases fecal matter (poop) in the water.
